SKILLS

- ◆ Strong problem-solving skills
- ◆ Excellent communication skills
- ◆ Cloud security and identity access management (IAM)
- ◆ Network and endpoint security
- ◆ Agile Methodologies (Scrum, Kanban)
- ◆ Pentesting & Ethical Hacking (Vulnerability analysis, OWASP Top 10)
- ◆ Programming Languages (Java, Python, SQL)
- ◆ Chronicle SIEM and SOAR, SCC, CrowdStrike
- ◆ NIST CSF, NIST SP 800-53, HIPAA, SOC
- ◆ Incident lifecycle management
- ◆ Python and Bash scripting for security automation
- ◆ Log analysis
- ◆ Compliance evaluation and vulnerability assessment

PROJECTS

Cloud Security Projects and Security Automation

- Developed and implemented secure architectures in cloud environments, focusing on Google Cloud Platform (GCP).
- Automated security tasks using Python and Bash, including log collection and analysis, incident response, and security checks.
- Collaborated on vulnerability assessments and applied patches to mitigate risks.
- Implemented **Identity and Access Management (IAM)** policies to enforce **least privilege** access in cloud environments.
- Configured **Google Cloud Security** tools for **threat detection, compliance monitoring, and incident response**.

SOC Fundamentals (Hands-On Lab)

- Identified and remediated vulnerabilities in cloud environments using the Security Command Center (SCC).
- Created access policies based on the principle of least privilege and reviewed permissions.

Security Compliance & Risk Assessment

- Conducted **security audits** to ensure compliance with **ISO 27001, GDPR, and NIST frameworks**.
- Created reports with **mitigation strategies** to improve security posture.
- Evaluated cloud configurations for misconfigurations and **compliance gaps**.

EDUCATION

GOOGLE CLOUD CYBERSECURITY CERTIFICATE

March 2025

ETHICAL HACKER CERTIFICATE (IN PROCESS)

December 2024

FULL STACK JAVA DEVELOPMENT

December 2023

SOC FUNDAMENTALS CERTIFICATION

Sept 2024
